

SpinShield™

... for Love of Life, Leisure and Limb.
(because accidents have happened)

Protect yourself, your family and friends from potential serious injury during boat lift winch wheel operation. One of the biggest safety issues surrounding boat lift winch wheel operation is the ability for limbs to get quickly caught in the spinning wheel spokes. This can result in serious injury such as fractures or even severed limbs. In just minutes and for little money you can install an SVI Spin Shield™ and enjoy greater peace of mind on your dock.

A sensible solution and a must have product from SVI.

Standard Colors

White

Yellow

Blue

Custom colors and private labelling for dealers available on request.

The Spin Shield™ is available for most popular boat lift makes including:
Shore Master
Shore Station
Hewitt
Floe
Great Lakes
Craft Lander
and others.

SpinShield
Made in the USA

The SVI Spin Shield™ is a patent pending product designed to increase safety on your dock. Lightweight, very durable and rigid UV stabilized polyethylene panels easily secure to the winch wheel filling the voids between the spokes. The SpinShield™ panels allow for full use of the wheel whether manually or if you are using an optional electric drive system. Since keeping people safe around your boat and on your dock is a top priority, no winch wheel operated boat lift owner should be without the Spin Shield™. Installing in just minutes, your Spin Shield™ will provide lasting protection and keep limbs where they should be, on the outside of the spinning wheel.
